NEWS

I Have a Wiggly Tooth!

I wiggle and wiggle my tooth. I cannot wait for it to come out. Have you ever lost a tooth?

My name _____

Who Loses

Kids lose teeth!

How does it happen? You have 20 **baby teeth**. Adult teeth are under your **gums**.

An adult tooth pushes against the baby tooth. The baby tooth falls out. Now the adult tooth can grow in!

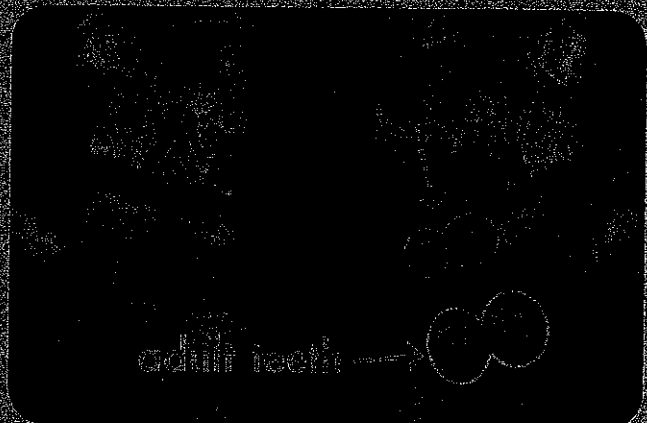

Sharks lose teeth!

Some sharks lose a tooth every week! Their teeth grow in many rows. Some sharks have five rows of teeth!

When a tooth falls out, a tooth from the row behind it moves up and takes its place.

Find the Adult Teeth

This is an X-ray of a child's mouth. Can you see the adult teeth under the baby teeth?

es Teeth?

Snakes lose teeth!

Look at those **fangs**! Fangs are sharp teeth. Snakes sink their fangs into animals they want to eat. Ouch!

Sometimes, the fangs break off. That's no problem for the snakes. They grow new ones.

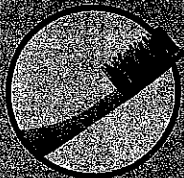

Kittens lose teeth!

Fuzzy little kittens have baby teeth, just like kids do. They are called **milk teeth**.

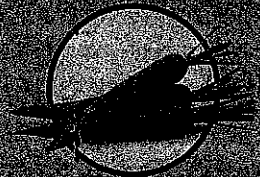

Most animals with fur lose their teeth when they are young. Bigger adult teeth take their place. Chomp!

BIG WORD: Permanent

Another name for adult teeth is permanent teeth. Permanent means forever. How can you take care of your permanent teeth?

Brush

Eat healthy foods

Go to the dentist

What's Inside My Teeth?

Look at the diagram of the tooth. Then fill in the bubbles for the correct answers.

The crown is the top of the tooth.

Pulp is the soft inside of the tooth.

Gums surround the tooth.

The roots hold the tooth in place.

1. What holds the tooth in place?

roots

crown

pulp

2. What is the soft inside of the tooth called?

_____ more marbles

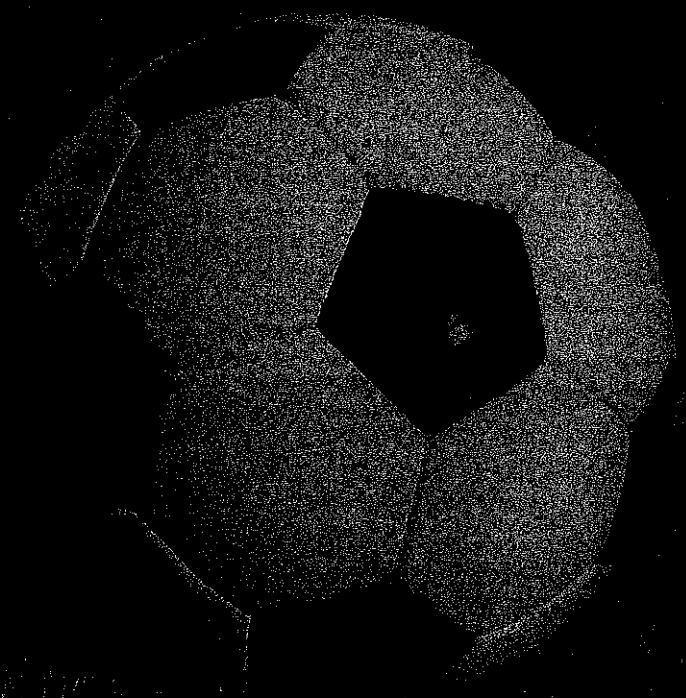

TAKE HOME ACTIVITY • Have your child draw a picture to solve $7 + 4$. Then have him or her tell a related subtraction fact.

 SCHOLASTIC
NEWS

Go to www.scholastic.com/sn1
for forces and motion videos,
core skills activities,
and Spanish editions.

Make It Move!

Discover how forces and motion
affect the world around you.
Learn about the science of
movement and how it works.

My name _____

The Science of Soccer

How do you make things move? You use force.

The soccer player wants to make that ball move. What does she do? She kicks it, of course!

When she kicks the ball, she uses **force**. We use force to move things. Her foot pushes the ball forward.

Her first kick is not very hard. She doesn't use a lot of force. The ball goes only a foot in front of her.

She kicks the ball again. This time, she kicks really hard. She uses a lot of force.

All that force makes the ball go far. The ball **soars** through the air. It goes right past the goalie and into the net.

Goal!

—Laine Fall

Two Kinds of Force

There are two kinds of force.
You use them both to move things.

Pull

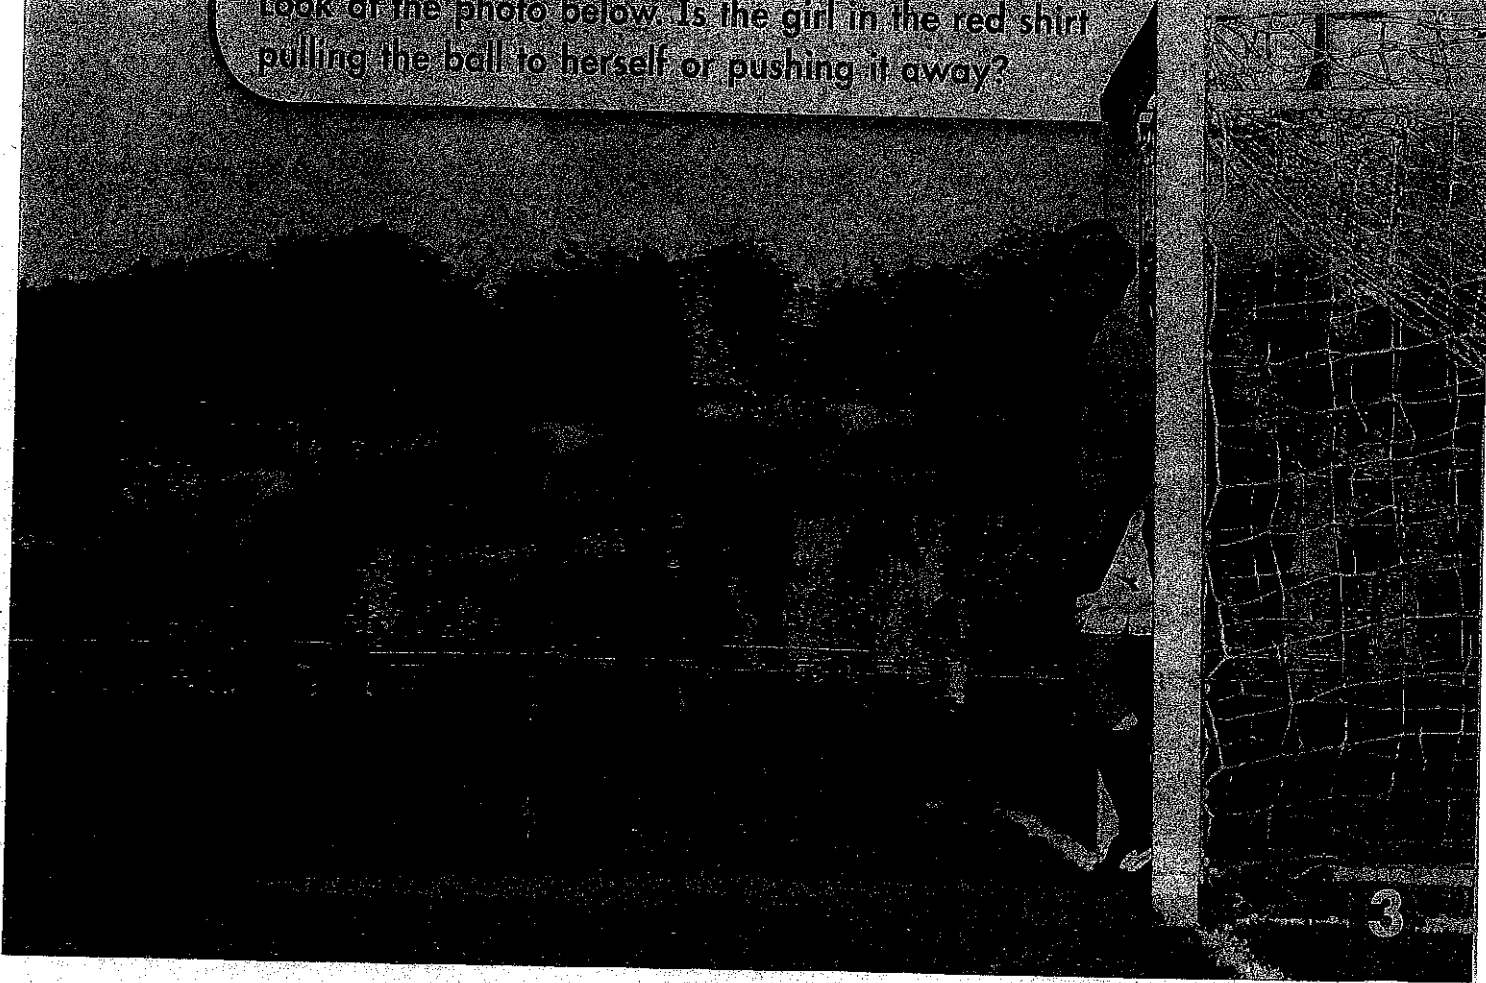

One kind of force is a pull.
When you pull something,
you move it closer to you.

Push

Another kind of force is a push.
When you push something,
you move it away from you.

Look at the photo below. Is the girl in the red shirt
pulling the ball to herself or pushing it away?

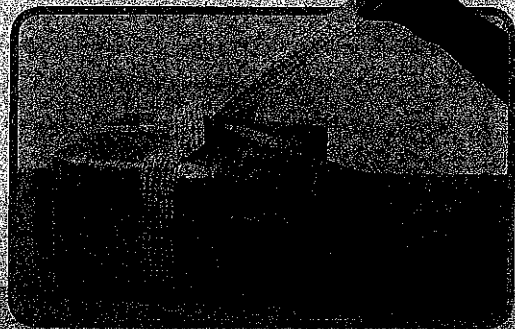

Push or Pull?

Which kind of force does each photo show?
Fill in the bubble for the correct answer.

SCHOLASTIC

NEWS

Watch our video about ducks at www.scholastic.com/sn1.

This picture was
Photoshopped to show
a mama duck with
many ducklings.

One Little, Two Little, 76 Little Ducklings

Last summer, 76 ducklings were swimming with one adult duck.
Why were there so many ducklings? It was a mystery!

My name _____

The Great Duckling Mystery

Last summer, a man went to a lake. He could not believe what he saw. An adult duck was swimming with dozens of ducklings. He counted them: 10, 20, 30... There were 76 ducklings!

Why was the adult swimming with so many ducklings? Was she the mom of all of them?

Scientists Had the Answer

Scientists said she was *not* the mom of all those ducklings. A mama duck lays about 12 eggs in a nest. This adult duck could not have laid 76 eggs. That is just too many for one mom.

What was going on?

Duck Day Care

The scientists said... was in charge of duck... The parents of the other... They needed to go to... grow new feathers.

So this adult duck... for many of their duck... more and more duck... **crèche** (kresh). A crèche... baby birds.

One adult duck +... one ducky day care...

This is the adult... She watched over 76...

Insect

Showdown

A praying mantis is on the hunt.
A honeybee is being hunted.

Who
will
win?

My name _____

Predator vs. P

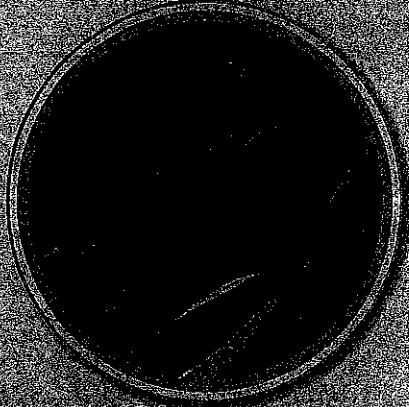

Mantis Eyes

The praying mantis can see really well. It has five eyes! It has one on each side of its head and three little ones on top. The mantis is always on the lookout for prey, like bees.

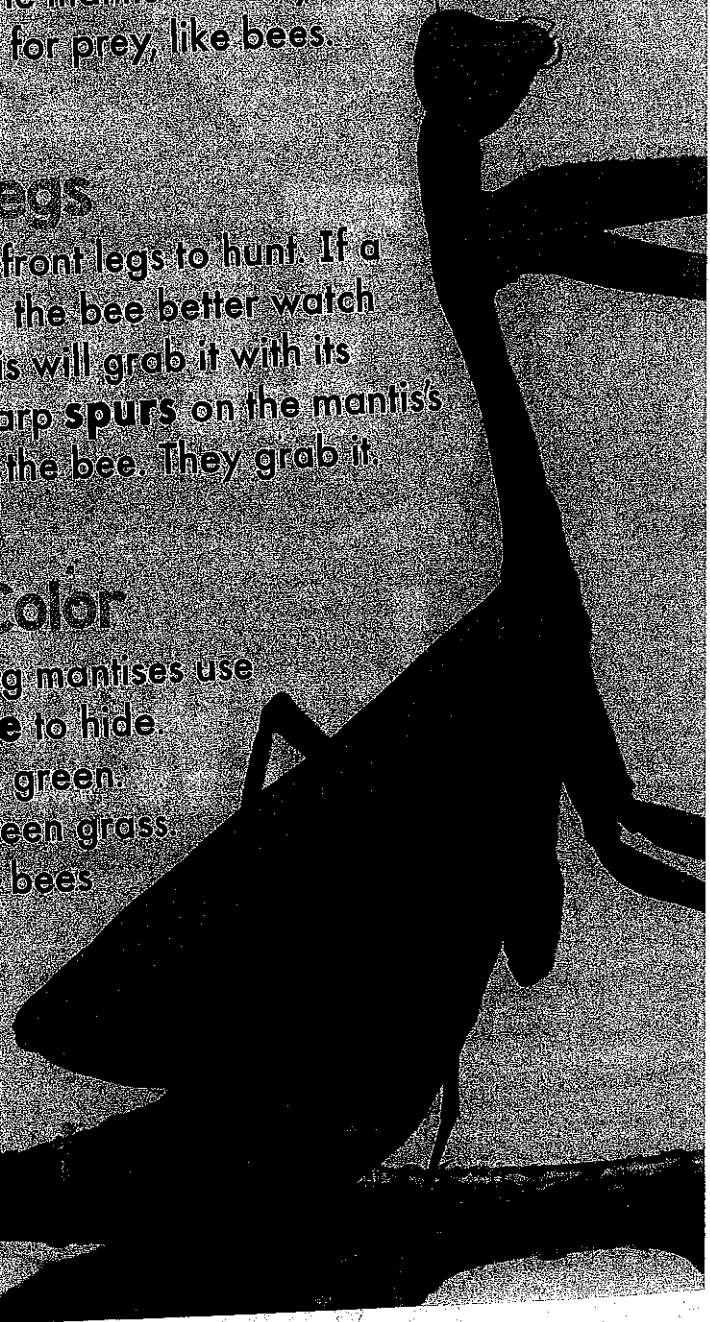

Mantis Legs

It uses its two front legs to hunt. If a bee flies near, the bee better watch out. The mantis will grab it with its front legs! Sharp **spurs** on the mantis's legs stick into the bee. They grab it.

Mantis Color

Many praying mantises use **camouflage** to hide. This mantis is green. It hides in green grass. It is hard for bees to see it!

rey

A praying mantis is a **predator**.
Predators hunt other animals for food.
A honeybee is **prey**. Prey get hunted.

Honeybee Eyes

The honeybee has five eyes too. It has two big ones and three little ones. It sees really well. It is always watching out for predators, like praying mantises.

Honeybee Wings

The bee has wings. It can fly away from a praying mantis. The praying mantis won't follow the bee. The mantis doesn't use its wings to fly very often.

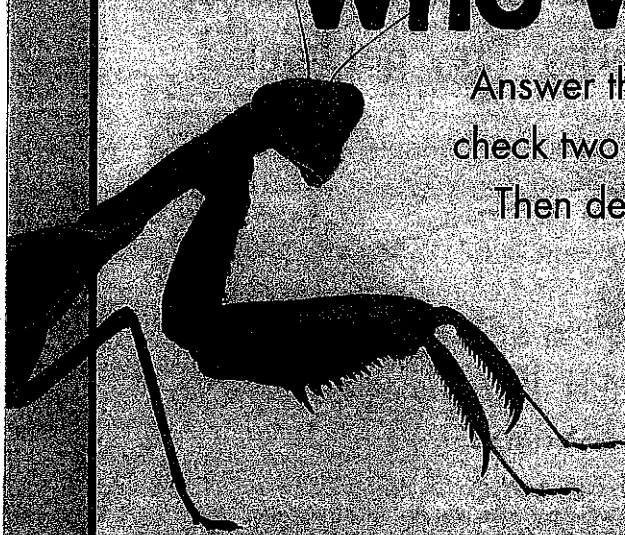

Honeybee Stinger

The bee has a sharp stinger. It will sting any animal that attacks it. But the bee has to be fast enough to sting before the mantis catches it!

Who Would Win?

Answer the questions. It's OK to check two boxes for one question. Then decide who would win!

Praying Mantis

Honeybee

1. Which animal can see really well?

2. Which animal has sharp spurs on its legs?

3. Which animal can hide in green grass?

4. Which animal flies away from predators with its wings?

5. Which animal has a sharp stinger?

★ Bonus

Which insect do you think would win? Why?

Who Picks Up the Trash?

We throw away a lot of trash every day. Whose job is it to pick up and take it all away?

My name _____

That's Her

She goes to work early.

Erin gets to work at 6:00 in the morning! It is dark outside. There are not many cars on the roads.

She tries to pick up a lot of trash early. The roads get busy later in the morning. It's harder to drive on busy streets.

She drives the truck or loads the trash.

Two people work on every truck. They are the driver and the **loader**. One drives the truck. The other loads trash onto the truck. They take turns.

They work together for eight hours each day. They become friends!

Where Does All the Trash Go?

Garbage trucks take the trash to a **landfill**. That is a big area for trash. Other trucks put dirt on top of each layer of trash.

Job!

Erin is a sanitation worker.
She helps keep her community clean.

She is fast but careful!

Erin says trash is stinky!
She tries to get the trash on
the truck as fast as she can.

She also sees rats and big
bugs. She is careful around
them. She works quickly.
She gets back in the truck so
that they don't crawl on her!

She stays safe.

She wears long sleeves and
pants. That keeps trash off her
body. Rubber gloves keep her
hands safe from sharp objects.
Strong boots keep her feet safe
if she drops trash onto them.

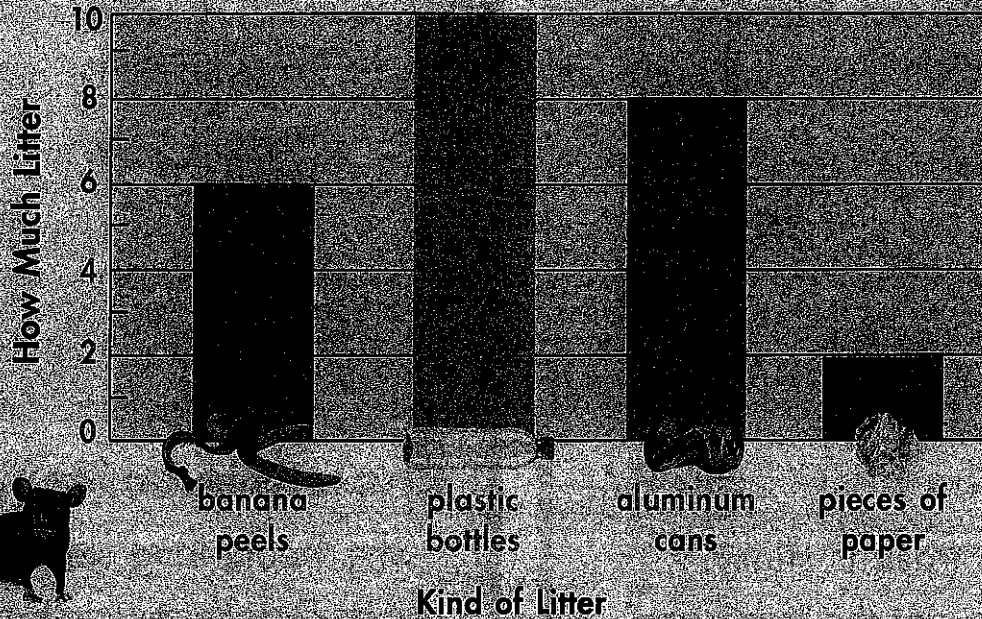

She wears a vest with
reflectors on it. It helps
people see her in the dark.

Plastic, glass, and paper
can go to a landfill.
Some go to a place where
they get recycled.

Littering Is the Worst!

Erin says, "Littering is the worst!" Always be sure to throw your trash in a can. The graph below shows how much litter someone picked up in the park.

Litter Graph

1. How many banana peels were picked up?

4

6

2

2. How many aluminum cans were picked up?

4

10

8

3. What kind of trash did the person pick up the most of?

banana peels

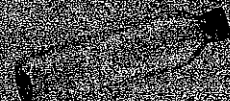

plastic bottles

pieces of paper

★ Bonus

Plastic, aluminum, and paper can be recycled.

Circle which ones should go into recycling bins.

WORK PACKET #16

TASKS FOR THE DAY

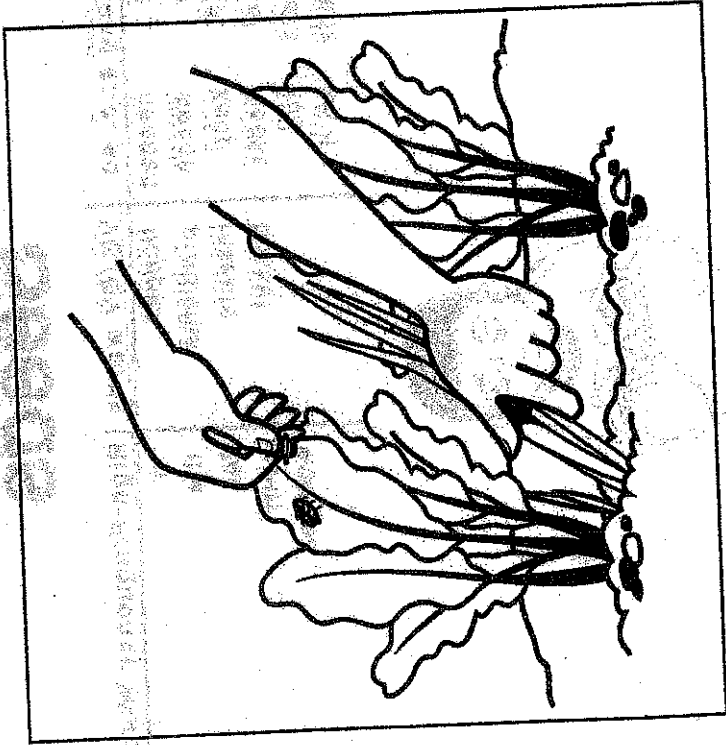

- **READ SEEDS.**
- **READ WORDS ON MIXED FLUENCY PRACTICE.**
- **DO PAGE 207 ABOUT EXCLAMATORY SENTENCES.**
- **MATH- DO PAGE 591-592.**
- **READ AND DO QUESTIONS ON SCHOLASTIC MAGAZINE: "TAKE ONLY PICTURES, LEAVE ONLY FOOTPRINTS".**

If you have any questions, please message me on the Remind app, and I will answer you! Or you can call me 304-642-4244.

Thank you!

Hope you all are safe and healthy!

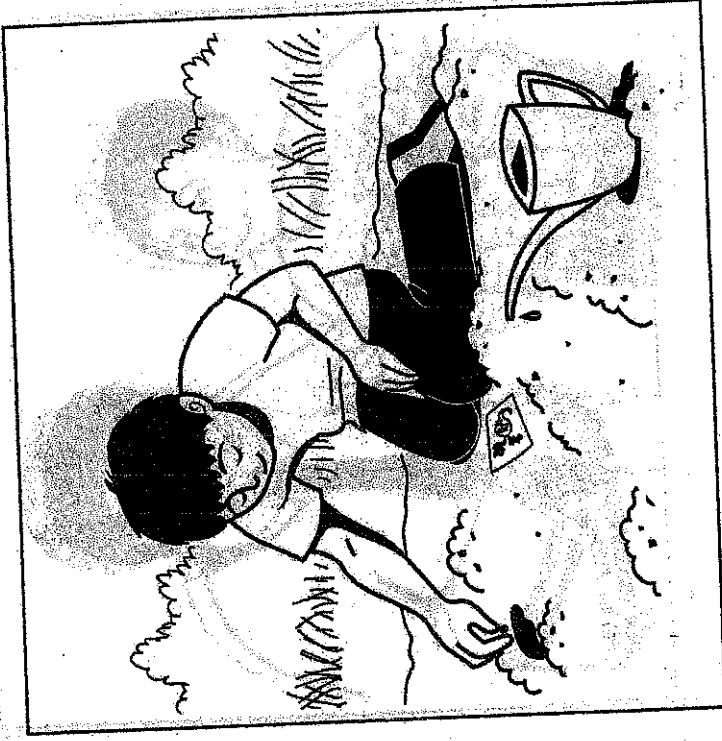

Mrs. Charlotte Armentrout ☺

Lee had problems.

Weeds came in.

Lee had to keep insects off.

Lee dug holes for the seeds.

He watered the seeds.

“What will happen?” he asked.

Name _____

Exclamatory Sentences

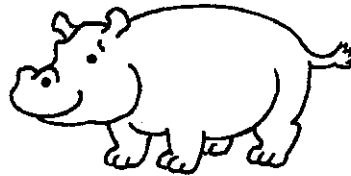

An **exclamatory sentence** is a sentence that shows strong feeling. It begins with a **capital letter**. It ends with an **exclamation mark (!)**.

The animal is big!

Underline each sentence that is an exclamation.

1. That hippo is funny!

2. It looks mad!

3. Where does it live?

4. It can live in the mud.

5. Now the hippo is happy!

6. I like the hippo.

Home Activity Your child learned about exclamations. Have your child read each exclamation on this page with strong feeling. Then take turns with your child saying exclamations of your own.

Name _____

Read Bar Graphs

Learning Objective You will learn to read, compare, and interpret information shown in a bar graph.

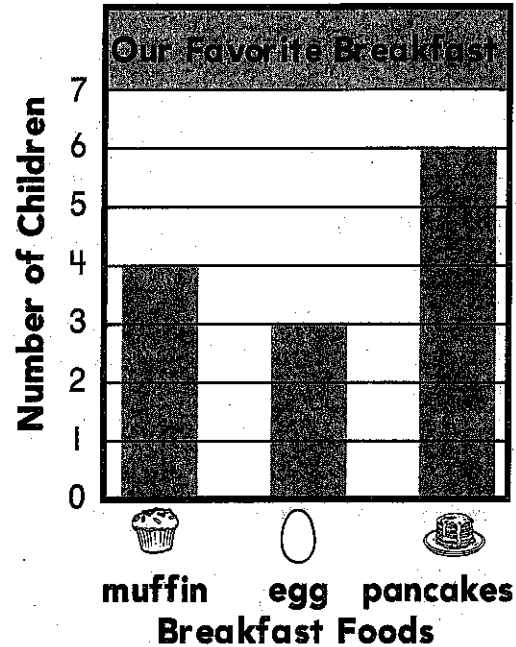

Use the bar graph to answer the question.

1. How many children chose ?

_____ children

2. How many more children chose  than ?

_____ more children

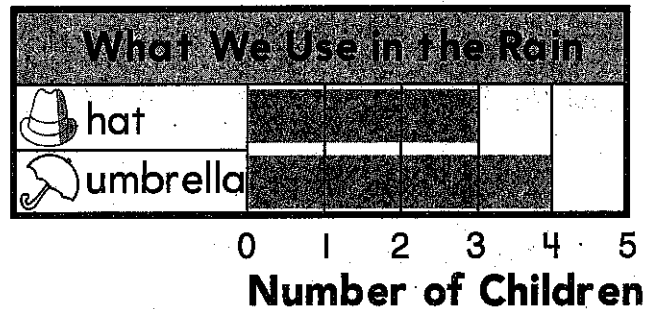

Problem Solving

Use the bar graph to answer the question.

3. Claudette uses an . Add her to the graph. Now how many more children use an  than a ?

_____ more children

Rain Gear

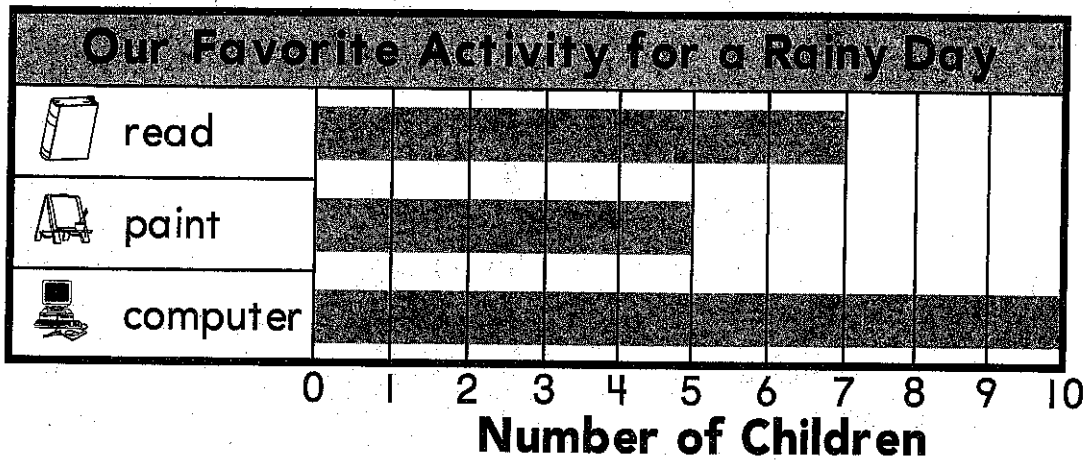

4.  Math Use numbers and pictures to compare two items in a bar graph.

Lesson Check

Use the bar graph to answer the question.

Kinds of Activities

1. How many more children chose than ?

_____ more children

Spiral Review

2. Write a subtraction sentence you can solve by using $9 + 7 = 16$.

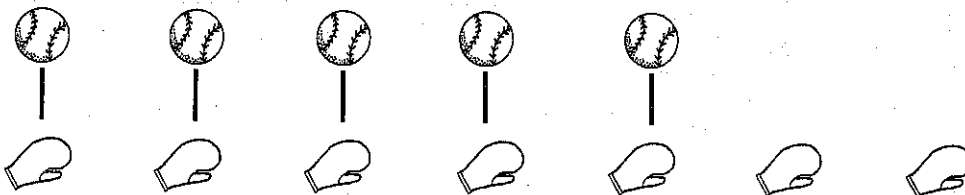

_____ - _____ = _____

3. How many fewer are there?

Subtract to compare.

$$7 - 5 = \underline{\quad}$$

_____ fewer

As You Read

Think of things you can do to help keep Earth beautiful.

My name _____

Respect for the Earth

Take Only Pictures

You see a tree with cool bumpy bark. Should you peel off a piece to take with you?

No way. It took that tree a long time to grow that bark.

Everything you see in the woods belongs there. If you see something cool, take a picture of it! Then you can look at it again and again.

Leave Only Footprints

You're done eating a granola bar. Should you throw the wrapper on the ground?

That's not a good idea. An animal could eat that wrapper and get sick.

If you bring something into the woods, bring it back out with you. You should leave only your footprints behind.

Nature is the home of many plants and animals. Here are some ways to respect it.

Let the Animals Be

You spot some raccoons in a tree. They look so soft! Should you pet them?

Nope. **Wild** animals are not pets. You can scare them. And they could hurt you.

Don't share your snacks with them either. They could get sick. Animals can find their own food!

Follow the Trail

You're walking on a trail through the woods. It would be fun to explore off the trail. Should you?

No. The trail is the safest path through the woods.

Being respectful of nature helps keep it beautiful. It helps keep you safe too!

Reduce, Reuse, Recycle

Here are three ways to help Earth from your home or school!

Reduce

To **reduce** means to make less of something. Write on both sides of a piece of paper. That will make less trash!

Reuse

To **reuse** means to use again. Use a lunch box every day instead of a new paper bag.

Recycle

When something is **recycled**, it is turned into something new. If you recycle a bottle, it can be turned into a new one.

1. Reduce means to make _____ of something.

less

more

a mess

2. You use a lunch box every day. You are _____.

reducing it

reusing it

recycling it

3. Make less trash by writing on _____ of paper.

both sides

just one side

just the top

What Would You Do?

You finished your bottle of water.
You don't see a recycling bin.
What would you do?
